---

Experienced Front End Developer with a passion for programming and a strong ability to adapt to evolving technologies and challenges. Committed to delivering high-quality projects and fostering collaboration within teams. Proficient in a range of Front-End technologies and development methodologies.

### Skills:

- Front End Technologies: Next.js, React, TypeScript, JavaScript, CSS3, HTML5, Bootstrap, Tailwind, MUI
- Back End Technologies: MySQL, PostgreSQL, Java, Node.js
- Development Tools: Git, GitHub, GitLab, SVN, Visual Studio Code, NetBeans, IntelliJ

### Education

University Degree in Programming

Universidad Tecnológica Nacional (UTN), San Rafael, Mendoza, Argentina (2022 - 2023)

### Languages

Spanish - Native | English - B2 | Portuguese - Basic

### Work experience

#### **SOFTO - Front End Developer** (November 2023 - Present)

- Maintain the company's website (<https://sof.to/>), ensuring clean, modularized code and good SEO practices.
- Implemented multi-language support (English and Portuguese) using Next.js, enhancing user experience and accessibility.
- Test with Cypress

Technologies and tools: Nextjs, React, TypeScript, Material UI (MUI), styled-components, react-hook-forms, axios, dayjs, next-i18next, next-seo, next-translate, Cypress, Git, GitHub, Jira

#### **FREELANCE - Front End Developer** (January 2024 - Present)

##### **KQSS**

- Developed the MVP of DevRank, a web app utilizing artificial intelligence to match developers, within a two-month timeframe, working independently as the sole Front End Developer.
- Making the MVP of Veritec, a web app that with artificial intelligence generates reports to lawyers, e-mails and documents they have for legal cases, classifies them and summarizes the information.
- Making the landing page of Veritec: <https://veritec.ai/>

Technologies and tools: React, TypeScript, Material UI (MUI), react-hook-forms, sweet-alert2, dayjs, Vite, Git, GitHub.

## **DG SMART GROUP**

- Making the landing page: <https://dgsmartgroup.com/>

Technologies and tools: HTML5, CSS3, JavaScript, Git, GitHub.

## **SOFTTEK ARGENTINA - Front End Developer** (January 2023 - December 2023)

Project: Technological Renewal - Refunds / Orders / Authorization (OSDE)

Migration of the Refunds, Orders and Authorization modules for OSDE (the main provider of private medicine in Argentina) with nationwide implementation in all its offices, where affiliates submit their health benefits and request reimbursement or authorization thereof.

It is an interactive web application, with efficient performance, implementing responsive design and compatibility with all browsers (including Internet Explorer).

I use Agile and Scrum methodologies, working together with: BackEnd Developers, who build the microservices we use and test in Swagger and Postman, the UX/UI Designer, who according to the company's branding designs the attractive and coherent user interfaces and the Functional Analysts.

Technologies and tools: Nextjs, React, TypeScript, Material UI (MUI), react-router-dom, react-hook-forms, axios, dayjs, Swagger, Postman, Git, GitLab

## **HOGARTH ARGENTINA - Front End Developer** (January 2022 - January 2023)

Project: Geo localization of web pages for major technology company

I work with websites for all America, divided in: Brazil, Colombia, Chile, Latin America in Spanish and English, and Canada in French and English, understanding those languages. Layout of pages and emails with a high standard of quality, responsive design, mobile first and prioritizing accessibility. Correction of visual bugs.

Technologies: HTML5, CSS3, JavaScript, SVN.

## **PIGMALION SOFTWARE - Back End Developer** (August 2021 - January 2022)

Project: Technological renovation - SAP and Reporting (BYMA)

Performing the migration of existing database and microservices for BYMA (Bolsas y Mercados Argentinos) we divided into teams and I participated in two of them: SAP, to generate reports of fixed size files and Reports where PDF files are generated in different formats according to the query made to extensive database (more than 60 tables).

Technologies: Java 11, JasperReport, pgAdmin, PostgreSQL, Kuarkus, Redis, Jira, Git, GitLab.

## **CONSULT-AR - Front End Developer** (March 2021 - January 2022)

- Maintained and updated web pages for travel agencies in Latin America, implementing new features and optimizing performance.
- Being in charge of the search and flight booking module.
- Managing database and hosting to configure new sites.

Technologies: HTML5, CSS3, Bootstrap, Smarty templates, WordPress, cPanel, phpMyAdmin.
