<https://www.linkedin.com/in/mariaeugeniacaosta/>

Front End Developer with 2 years of experience, passionate about programming, with the ability to quickly learn new technologies and adapt to changes.

Results oriented and committed to delivering high quality projects.

Experienced working with Scrum methodologies, to improve collaboration and team efficiency. I am a collaborative person and enjoy working in a team, contributing my skills and learning from others.

Skills: React, TypeScript, JavaScript, CSS3, HTML5, Bootstrap, MUI, MySQL, Postgresql, Java, Node.

Development tools and methodologies: version control systems (svn, git, GitHub and GitLab), development environments (Visual Studio Code, NetBeans and IntelliJ).

Education

University Degree in Programming // Universidad Tecnológica Nacional (UTN), San Rafael, Mendoza, Argentina - Last subjects in progress

Languages

Spanish - Native - English - B2 | English - B2 | Portuguese - Basic

Work experience

SOFTTEK ARGENTINA

January 2023 - Present

Front End Developer

Project: Technological Renewal - Reintegros (OSDE)

Migration of the Reintegros module for OSDE (the main provider of private medicine in Argentina) with nationwide implementation in all its offices, where affiliates submit their health benefits and request reimbursement of the same.

It is an interactive web application, with efficient performance, implementing responsive design and compatibility with all browsers (including Internet Explorer).

I use Agile and Scrum methodologies, working together with: BackEnd Developers, who build the microservices we use and test in Swagger and Postman, the UX/UI Designer, who according to the company's branding designs the attractive and coherent user interfaces and the Functional Analysts.

Technologies and tools: React, TypeScript, Material UI (MUI), Swagger, Postman, Git and GitLab.

HOGARTH ARGENTINA

January 2022 - January 2023

Front End Developer

Project: Geo localization of web pages for major technology company

I work with the websites for all America, divided in: Brazil, Colombia, Chile, Latin America in Spanish and English, and Canada in French and English understanding those languages. Layout of pages and e-mails with a high standard of quality, responsive design, mobile first and prioritizing accessibility. Correction of visual bugs.

Technologies: HTML5, CSS3, JavaScript, SVN.

PIGMALION SOFTWARE

August 2021 - January 2022

Back End Developer

Project: Technological renovation - SAP and Reporting (BYMA)

Performing the migration of existing database and microservices for BYMA (Bolsas y Mercados Argentinos) we divided into teams and I participated in two of them: SAP, to generate reports of fixed size files and Reports where PDF files are generated in different formats according to the query made to extensive database (more than 60 tables).

Technologies: Java 11, JasperReport, pgAdmin, Postgresql, Kuarkus, Redis, Jira, Git and GitLab.

CONSULT-AR

March 2021 - January 2022

Front End Developer

Maintenance of web pages for travel agencies in several Latin American countries, updating content (modifying contact details, sections of a page, creating new sections or pages, etc) and being in charge of the search and flight booking module, which could be implemented separately, so I had to layout the same header and footer of the agency that hired and create from scratch the module, making the necessary configurations, managing database and hosting.

Technologies: HTML5, CSS3, Bootstrap, Smarty templates, WordPress, cPanel, phpMyAdmin.
